LeetCode

EDUCATION

B.E. Computer Science Engineering
Saveetha Engineering College, Chennai

2023–2027
CGPA: 8.0 / 10

PROFESSIONAL SUMMARY

Python Developer with strong foundations in OOP and backend development.
Experience building FastAPI-based services and deployed backend systems.
Proficient in relational databases, Git workflows, and performance-oriented development.

SKILLS

Programming Languages: Python, Java, JavaScript, C
Backend Development: Node.js, Express.js, Flask, FastAPI
Frontend Development: React, Bootstrap
Databases: PostgreSQL, SQL, Firebase, Supabase
AI & Automation: Agentic AI Systems, Workflow Automation, Ollama
Tools & Technologies: Git, Docker, Neovim, Shell Scripting, OpenCV
Core Concepts: Object-Oriented Programming, Data Structures

EXPERIENCE

Intern — NSK Technologies, Chennai Jan 2025 – Feb 2025

- Developed backend services using Python with structured and modular design.
- Worked with relational databases and optimized SQL queries for performance.
- Contributed to testing, issue resolution, and system performance improvements.
- Collaborated with team members using Git-based workflows.

Virtual Assistant (Freelancer) — Fiverr Apr 2022 – May 2023

- Built Python automation scripts for data processing and workflow tasks.
- Managed documentation and handled multiple client requirements.

PROJECTS

Project Steve — n8n Automation [Link](#)

- Built a FastAPI backend to convert user prompts into structured n8n workflow JSON.
- Implemented validation, error handling, and modular architecture.
- Designed scalable logic for dynamic workflow generation.

Sherlock — Job Search Automation Platform [Link](#)

- Developed a job aggregation system to collect listings from multiple sources.
- Implemented filtering mechanisms to refine job search results.
- Built automation workflows for continuous job tracking.

Eartify — Data Processing Backend System [Link](#)

- Built pipelines to process and transform raw data into structured formats.
- Implemented backend modules for efficient data handling.
- Generated outputs suitable for downstream applications.

CERTIFICATIONS

- Python Certification — Python Institute / CS50P (in progress)
- Introduction to MongoDB — MongoDB
- Applied AI with Python — Microsoft

ACHIEVEMENTS

- NPTEL — Top 1%
- NASSCOM — Qualified for Second Round
- CODE CRUSADE — Winner
